JUNIOR WEB DEVELOPER

I am a passionate computer engineering student with hands-on experience in web development. I specialize in creating efficient and responsive websites using modern technologies. With a strong foundation in coding and problem-solving, I am eager to apply my skills to real-world projects and grow as a developer. I am highly motivated, quick to learn, and constantly striving to enhance both my technical and soft skills.

KEY COMPETENCIES

Front-end Development	Version Control	Debugging and Testing
Back-end Development	Responsive Design	Algorithmic Thinking
Database Management	API Integration	Team Collaboration

PROFESSIONAL EXPERIENCE

KD Web London

Mar 2024 - Nov 2024

Junior Web Developer

In my role as a Junior Web Developer at KD Web London, I specialized in building and maintaining websites using WordPress, customizing themes and plugins to meet client needs. I worked extensively with cPanel to manage server settings, configure domains, and ensure smooth website performance. Additionally, I contributed to front-end development with HTML, CSS, and JavaScript, collaborated on back-end tasks in PHP, and played a key role in optimizing website performance and resolving technical issues.

KD Web London

Sep 2023 - Mar 2024

Web developer Intern

During my internship at KD Web London, I assisted in developing and maintaining WordPress websites, customizing themes, and implementing new features. I gained valuable experience working with cPanel for server management and collaborated with the development team to troubleshoot issues and optimize site performance. This role helped me build a strong foundation in both front-end and back-end development.
